Samfresh-ai

Website: <https://samfresh-portfolio.netlify.app/>

## **Professional Summary**

I build fast, practical web3 and AI products. With 2+ years of hands-on experience,

I've shipped 10+ projects, from DeFi tools to AI debugging agents and small blockchain games.

I work fast, solve messy problems, and turn ideas into working products.

I'm open to full-time or remote roles in web3, AI, or full-stack engineering.

## **Technical Skills**

Frontend: React, Tailwind, JavaScript

Backend: Python/Flask, Node.js, Express

Blockchain: Solidity, Web3.js, Ethers.js, ERC-20/721, Monad, Sepolia, Rust

AI/ML: Llama models, Sentient AGI agents

Tools: Hardhat, Railway, GitHub Actions, Netlify

## **Projects & Experience**

### **ROMA Debug Override – Sentient AGI**

I Built a Python tool that reads and fixes runtime errors automatically using reasoning agents.

Cut debugging time by ~70% and shared the tool open-source.

### **MilliSwap DeFi Aggregator**

Created a cross chain swap dApp with React and Solidity.

Supports 10+ simulated trades and is optimized for gas and clean UX.

### **Dobby Roast AI**

Made a fun Llama-powered roast generator with a Node backend and caching to bypass X API limits. Reached 200+ users during early testing.

### **Testnet Faucet Hub**

Built a one click testnet token deployer for Monad/Sepolia and MegaETH.

Helps new devs onboard quickly and has processed 2K+ simulated deploys.

### **Dobby Chess Bot**

Integrated Stockfish into a Flask backend for an AI chess opponent with session tracking.

### **Desert Racer Web**

Ported a desert racing game to JS/Canvas and connected it to MegaETH for NFT rewards.

### **Monad Storage Contract**

Deployed and stress tested a storage contract with 2K+ transactions on Monad testnet.

### **Education & Certifications**

Self Taught Fullstack Web3 Developer (2023–Present)

Alchemy University – Web3 Developer (2024)

freeCodeCamp – Responsive Web Design (2023)

Sentient AGI Contributor Badge (2025)

### **Community & Achievements**

- Farmed 10+ testnet airdrops and shared insights online.
- 100K+ impressions on web3/AI posts on X.
- 100+ open source commits and mentoring support for new devs.
